

The missing TD Account no 018828, which was suppose to appear in the PENDING transaction under the TELLER module was in my opinion “accidentally CANCELLED”, that’s why its not appearing in the TELLER module for further POSTING of transaction.

You will see from the screen shots below of the Records of the account 018828 that was transacted under the Time Deposit module – process – RENEWAL.

The screenshot shows the phpMyAdmin interface in a Mozilla Firefox browser. The active database is 'cbl_txn' and the selected table is '_bnk_txn'. A SQL query has been executed: `SELECT * FROM '_bnk_txn' WHERE accno='018828'`. The result shows two rows of transaction data. The second row is circled in red.
